

10th grade at Herlufsholm

10th Go // 10th Global

Herlufsholm will be offering two 10th grade options in the 2019-2020 school year. Both 10th grades will enjoy an interconnected and unique environment as part of the Upper Secondary Campus. Our 10th grade concept is built upon the idea of social and academic development going hand in hand - focusing on personal development and academic achievement for all. This sense of identity and community will be further reinforced by a shared introductory phase and study trip, shared teaching modules in certain subjects and daily contact.

10th Go

10th grade Go is our preparatory class for Danish Upper Secondary School. This 10th grade is for the student who wishes to take the time to polish their academic skills and as such, be better prepared for the tempo and challenges of the Upper Secondary School.

Students will have the opportunity for in-depth academic work, and will be able to train their study and organizational skills with the help of an adult mentor. Our goal is to help our 10th graders become better students who are both academically stronger and who feel confident about facing the choices and challenges in their future. The United Nations Sustainable Development Goals will also feature as a part of the 10th Go curriculum.

10th Global

10th grade Global is for those who want to explore the world, encounter other cultures and qualify for an admission test for a Danish Upper Secondary School or IB Diploma.

Our teaching is primarily in English and we enjoy the benefits of having a friendship class abroad, which offers us international contact and perspective as well as an opportunity for exchange in certain periods.

10th grade Global will be working with the United Nations Sustainable Development Goals and as a part of our international focus, will have our students participate in Model United Nations activities here at Herlufsholm.

Students will be able to take official FP9 or FP10 exams as their abilities allow.

Shared and divided academic content:

10 th Go	10 th Global
Introductory phase and study trip	
German / French	
Phys. Ed.
